Final Diagnosis

Tuberous Sclerosis
 Dermatomyositis
 Pulmonary embolism
 Murine Typhus
 Rhabdomyosarcoma of the breast
 Non-Hodgkin's Lymphoma
 Status Asthmaticus
 Pancreatic pseudocyst
 Henoch-Schonlein Purpura
 Pulmonary Hemorrhage due to Non-Accidental Trauma
 Ovarian Torsion
 PCP pneumonia and X-linked HyperIgM Syndrome
 Infantile Botulism
 INH toxicity
 Duodenal Malrotation
 Diskitis
 Malignant Hypertension
 ALL
 Crohn's Disease with Erythema Nodosum
 Sepsis due to retained UA line from outside NICU
 Autoimmune Hepatitis with Splenic Sequestration
 Hepatitis A infection
 Mastoiditis with transverse sinus thrombus
 Toxic Shock Syndrome
 B-cell Lymphoma
 Myasthenia Gravis
 Ovarian Cyst
 Pyruvate Dehydrogenase Deficiency
 Drowning
 Hyperthermia secondary to environmental exposure
 Osteosarcoma
 Kawasaki's Syndrome with giant coronary aneurysm
 DKA
 Prolonged QT syndrome
 Pseudotumor Cerebri due to Minocycline
 Sacroiliitis
 Retropharyngeal Abscess
 Meningococemia
 Murine Typhus
 Black Widow Spider Bite
 Nephrotic Syndrome
 Acute Rheumatic Fever
 ITP
 Menetrier's Disease (hyperplastic gastropathy)
 Inferior lateral Coronary Infarct
 UTI with Posterior Urethral Valves
 Bone Infarct
 Non-accidental trauma (Shaken baby)
 Rhabdomyolysis and dilated cardiomyopathy
 Peptic Ulcer
 Mediastinal Abscess
 ALL
 Tetralogy of fallot (TOF)
 Ovarian Torsion
 Meckels Diverticulum
 Endemic Typhus
 Tuberculosis of the eye
 Complex migraines with hemiplegia
 Oculo-cardiac Reflex
 Coarctation of the Aorta

**Not all problem rounds cases have been included in this list.

Problem Rounds (July 2004 –June 2007)

USC Pediatrics

17 yo with fevers and lymphadenopathy
